

CLARIMEX 046

TECHNICAL DATA SHEET

POWDERED ACTIVATED CARBON

The activated carbon **CLARIMEX 046** is a product designed specifically for use in potable water. This product is certified by ANSI/NSF Standard 61 for potable water and conforms to AWWA B600 standard.

Due to its characteristics, this product can be used in other processes requiring moderate purification levels such as decolorization of edible oils.

PARAMETER	SPECIFICATIONS	TYPICAL PROPERTIES
Moisture, as packed, %	8 máx.	
Iodine number, mg I ₂ /g	500 mín.	
Water solubles, %		3.5
Apparent density, g/cc	0.25 - 0.45	
Tannin Value, ppm		
PARTICLE SIZE		%
% Passing 100 mesh		99 mín.
% Passing 200 mesh		95 mín.
% Passing 325 mesh		90 mín.
