

CLARIMEX 061 GAM

TECHNICAL DATA SHEET

POWDERED ACTIVATED CARBON

CLARIMEX 061 GAM is a vegetable based activated carbon of vegetable origin activated with phosphoric acid and further neutralized with sodium hydroxide.

CLARIMEX 061 GAM is specially formulated and manufactured for the challenges specific to purification of glucose.

PARAMETER	SPECIFICATIONS	TYPICAL PROPERTIES
pH	4.5 - 5.5	
Moisture, as packed, %	10 máx.	
Molasses Decolorization	140 mín.	
Methylene blue adsorption g MB/100 g	20 mín.	
Iodine number, mg I ₂ /g		800
Water solubles, %	4 máx.	
Ash %		8
Apparent density. g/cc		0.28
Vacuum Filtration, s cm ² / ml g		0.25
Test of Ammonium Hydroxide precipitate	Negativa	
MESH SIZE		
Passing 325 mesh, %	55 mín. 70 máx.
